SECTION 305 4-H SCIENCE DISCOVERY PROJECTS

Class Premiums... \$5.00...4.00...3.00...2.00

- ❖ The goal of this project and exhibit is to allow 4-H members to:
 - Use the scientific method to gain an understanding of how things work and the variables that affect them.
 - Take an open and creative approach to problem solving.
 - Learn that a successful outcome is based not on personal opinion but on scientific fact.
 - Improve written and visual communication skills

- ❖ 4-H members are encouraged to use their 4-H projects as the basis for their scientific research and discovery project. Exhibits should relate to one of the following topics:
 - Behavioral and Social Sciences
 - Biochemistry, Medicine, and Health Sciences
 - Botany and Zoological Sciences
 - Computer Science
 - Earth and Space Sciences
 - Engineering
 - Environmental Sciences
 - Mathematics
 - Physical Sciences
 - ❖ A few resources for finding project ideas are:
 - ❖ The WWW Virtual Library: Science Fairs - <http://physics.usc.edu/~gould/ScienceFairs/>
 - ❖ Information about Oklahoma Science Fairs - <http://ossef.zfairs.com/>
 - ❖ **Displays must be free standing and are limited to 3' X 4' (width x depth) when sides are extended.**
 - ❖ **Displays without reports will be judged accordingly. Displays with reports will be placed above those missing reports.**
1. Beginning Division (**Grades 3-5**) - A display illustrating the project.
 2. Intermediate Division (**Grades 6-8**) - A display with an accompanying report of approximately two typewritten pages.
 3. Advanced Division (**Grades 9-12**) - A display and a written report about the project that includes an interview with a scientist, science teacher or someone who is knowledgeable about the area that is being studied (Example: a beekeeper could help with bee projects). Reports should be three (3) to five (5) pages in length.
 4. Team Exhibit (**All Grades**) – Team may include a maximum of three members. - A display and a written report about the project. **It is recommended** that it include an interview with a scientist, science teacher, or someone who is knowledgeable about the area that is being studied (Example: an engineer could help with engineering projects). SECTION 306 4-H DESIGN & CONSTRUCTION

Class Premiums.....\$5.00...4.00...3.00...2.00

- ❖ **All Design and Construction projects will be REQUIRED to have the Skill Mastery Sheet securely attached to the project. Use a safety pin and attach directly to the exhibit when at all possible. NEVER attach sheet to a hanger! The sheet MUST be completed by the 4-H member.**
- ❖ The skill mastery sheet (<https://4h.okstate.edu/projects/design-andconstruction/curriculum-and-patterns.html>) is an education tool to guide project work. Click Sample Technique Cards to find instruction for many of the techniques noted in the skill sheets (i.e. facings, zippers, hems, fasteners, etc.).

- ❖ Instruction Sheets for the projects listed can be found at:
<https://4h.okstate.edu/projects/design-and-construction/project-guide-sheets.html>
- ❖ Fair exhibits have been carefully selected and directed for members to investigate and learn specific skills/information and to demonstrate mastery of these skills/information.
- ❖ The end-product/exhibit is being evaluated on the skills “learned/mastered.” The skill sheet serves as the member’s “personal reflection” and communicates to the judge what was learned. Why is this important? Because in 4-H, the reflection and application of what was learned is more important than the end product/exhibit.
- ❖ The skill sheet is to be used as a planning tool. It is important that each 4-H member take responsibility for the life skill of “learning to learn.” This may require members, leaders, and educators to look up terms and learn techniques as part of the educational process.
- ❖ Resources, instructions, and project guides are posted online. Members are encouraged to seek out other valid resources which teach proper technique and knowledge in the areas of design and construction.
- ❖ *General Skills to be mastered in project/product in ADC, IDC and HTDC:*
 - **Structural Design:** Construction technique, size, form, color and texture suited to the materials and product end use.
 - **Elements of Design:** The finished product illustrates the member is learning or “mastering” the basic elements of design - line, shape or form, texture, color, and space.
 - **Principles of Design:** The finished product illustrates an awareness and application of the principles of harmony, proportion, balance, rhythm, and emphasis adding dimension, interest and/or appeal to the finished product.
 - **Surface Design:** This is any lines, shapes, colors, textures, or materials applied to the product or item’s design that creates an emotional or personal quality, individuality, and creative expression without disturbing initial/end purpose/how it is used. Design is that “*something*” which makes the item unique to the individual designer.
- ❖ **Reports/Descriptions/Expense Sheet/etc.** – Exhibits requiring a report/description/expense sheet of any kind, can be typed or neatly/legible handwritten. Report should be one-two pages. If typed, it must be double spaced using a minimum of 12-point font. **Report MUST be SECURELY attached to the exhibit.**
- ❖ A 4-H member may enter one (1) exhibit per class.
